SYRACUSE UNIVERSITY
Higher Education Opportunity Act
2014 Campus Fire Safety Annual Compliance Report

Introduction

The following is Syracuse University's 2014 Campus Fire Safety Compliance Report. The report includes fire safety statistics, student housing facilities' safety systems, and fire safety policy standards and practices. It will be made available to current students and employees and prospective students and employees by electronic notification, mailings, and a website (<http://eho.syr.edu>). A copy will be sent to the U.S. Department of Education (DOE).

Fire Safety

The Fire and Life Safety Services Office (FLSS), under the direction of the Division of Campus Security and Emergency Services, is dedicated to maintaining a safe and healthy environment for the campus community. FLSS and the campus community cooperate in fulfilling this responsibility. The Syracuse University campus is serviced by the City of Syracuse Fire Department (SFD) which is an Insurance Services Office (ISO) class 1 fire department.

Syracuse University's student housing facilities include 21 major residence halls and 125 south campus apartment buildings.

Fire Safety Inspections by New York State

In 2003, the New York State Office of Fire Prevention and Control (OFPC) began to conduct annual inspections and audits that included inspections of student rooms, common areas, and mechanical spaces in the major residence halls, south campus apartments, academic and administrative buildings, and sports venues. These inspections are based on the New York State Fire and Property Maintenance Code and National Fire Protection Association (NFPA) standards.

OFPC also conducts follow-up inspections to ensure that any violations are corrected. If compliance is not met, a monetary fine is assessed. Since the inception of the OFPC inspection program, Syracuse University has not received a fine for non-compliance in any student housing facility.

Fire Safety Systems and Fire Safety Systems Inspections by Syracuse University

All Syracuse University residence halls are equipped with addressable fire alarm systems that are monitored 24 hours a day, 7 days a week by the Department of Public Safety (DPS).

In 1999, the University implemented a five-year \$12 million plan to retrofit all the University-owned residence halls with sprinkler systems. The plan was completed in four years. Currently, every University-owned residence hall has sprinkler systems protecting 100 percent of the building. The residence hall student rooms are equipped with both sprinklers and smoke

SYRACUSE UNIVERSITY
Higher Education Opportunity Act
2014 Campus Fire Safety Annual Compliance Report

detectors. The sprinkler systems are inspected, tested, and maintained as per New York State Fire Code and NFPA Standard 25. In addition, in accordance with NFPA Standards 13 and 25, the University has a five-year sprinkler obstruction plan. Under the direction of FLSS, the piping inside of the sprinkler systems is inspected with a camera to ensure that it is free of any debris and sediment buildup which may limit its effectiveness. Flushing of sprinkler piping is conducted as necessary.

The residence halls and south campus apartments are equipped with fire extinguishers, and training is provided to residence halls' directors and advisors at the beginning of every academic year. FLSS visually checks and maintains the fire extinguishers monthly.

Fire Safety inspections are conducted by FLSS in every residence hall at least four times per year. A report is submitted to the Office of Residence Life (ORL) and the Housing Zone maintenance staff. FLSS performs follow-up inspections to ensure that violations are corrected.

Fire Drills

In accordance with the New York State Fire Code, fire drills are conducted twice each semester in residence halls. FLSS assigns staff to the buildings to assist the ORL staff in timing the drills and ensuring that the proper evacuation procedures are followed. FLSS also maintains the proper documentation required for the New York State Fire Inspections. At the beginning of every academic year, FLSS conducts an annual Fire Safety Academy for the professional residence hall staff.

Fire Safety Policy

To minimize the potential for fire in student housing facilities, Syracuse University's policy prohibits unsafe behavior and storage of certain items in student housing. This policy is enforced by FLSS and ORL. Inspections are conducted each semester in student housing facilities to identify prohibited items. If candles, halogen lamps, lighter fluid, propane, or any other prohibited materials are found in student rooms, the items are confiscated by the FLSS and/or ORL staff, and the students are referred to the Office of Judicial Affairs or to ORL. Follow-up inspections ensure that the appropriate corrections were made.

Policy on Portable Electrical Devices, Smoking, and Candles*

- **Smoking:** Smoking is not permitted in any University residence hall or apartment.
- **Cooking and Portable Electrical Devices:** Except in locations provided, the students shall not use ovens, hot-plates, or high-resistance heating devices (including, but not limited to, coffeemakers, toasters, toaster ovens, popcorn makers, crock pots, grills, and other similar devices) for any purpose. Use of a compact microwave oven, up to 1000 watts, is permitted if it's the only appliance in use on the circuit.
- **Portable Heaters and Multi-headed Lamps:** Space heaters, halogen lamps, and multi-headed lamps are prohibited and subject to immediate confiscation.

SYRACUSE UNIVERSITY
Higher Education Opportunity Act
2014 Campus Fire Safety Annual Compliance Report

- **Candles:** Use or possession of candles or incense is prohibited. For religious observations, candles and/or incense may be used in public areas designated by staff with constant vigilance by the user. All candles discovered in a student's room/apartment will be confiscated and discarded; in the event that candles are found to be in use, students will be referred to the Office of Judicial Affairs.

*All above information was taken from Syracuse University Housing terms and conditions and Student Handbook.

Fire Safety Education and Training

FLSS and ORL with the assistance of the SFD and OFPC conduct an annual Fire Safety Academy for professional Residence Life staff. The academy consists of five training modules as follows:

- 1) Emergency Evacuation Procedures. This module is demonstrated by using theater smoke to simulate the conditions that would be present during a fire. FLSS staff discusses proper emergency evacuation procedures, informs the participants what to expect, and then sends participants through a smoke-filled hallway. After participants navigate the smoke-filled hallway, there is a brief discussion about lessons learned that Residence Life staff can present to student residents in their respective residence halls.
- 2) Automatic Fire Sprinkler Systems. Residence Life staff learn how sprinkler systems operate. The staff also observes a demonstration of a sprinkler system extinguishing a fire.
- 3) Hands-on Fire Extinguisher Training. Residence Life staff receive training on proper selection and use of fire extinguishers. The staff is then expected to extinguish a small fire using an extinguisher.
- 4) Classroom Training. FLSS and ORL teach the Residence Life staff about the University's fire safety policies and procedures.
- 5) Mock Residence Hall Room Burn. FLSS builds two fully furnished residence hall rooms side-by-side. One is equipped with a sprinkler head while the second is left unprotected. The mock burn provides the participants an opportunity to witness and observe how quickly a fire spreads in a non-sprinklered room and how sprinklers contain and extinguish a fire in a sprinklered room.

After receiving the training, Residence Life professional staff is then required to educate residence hall students living on their floors about what they learned during the Fire Safety

SYRACUSE UNIVERSITY
Higher Education Opportunity Act
2014 Campus Fire Safety Annual Compliance Report

Academy. Education is accomplished through floor meetings that are required within the first two weeks after the beginning of classes. The Residence Life staff is provided with a template to follow when conducting floor meetings. The template includes the following items: a) an overview of the fire safety systems in residence halls, b) emergency evacuation procedures, and c) emergency procedures and a list of appropriate emergency contacts. In addition to the fire safety floor meetings, the Residence Life staff is required to post, at least once per semester, fire safety information on the bulletin board on each floor. The information posted includes emergency and evacuation procedures, prohibited items, emergency contact information, and fire safety policies.

Fire Incident Reporting

All fire incidents are reported to FLSS or DPS. Information regarding each incident including a list of names, titles, email addresses, and phone numbers is added to this report and filed into the FLSS fire log within two business days after receipt. The fire log is available for public viewing at FLSS during normal University business hours.

All Fire Occurrences should be Reported to the Fire and Life Safety Services Office:

Improvement Plans for Fire Safety Systems

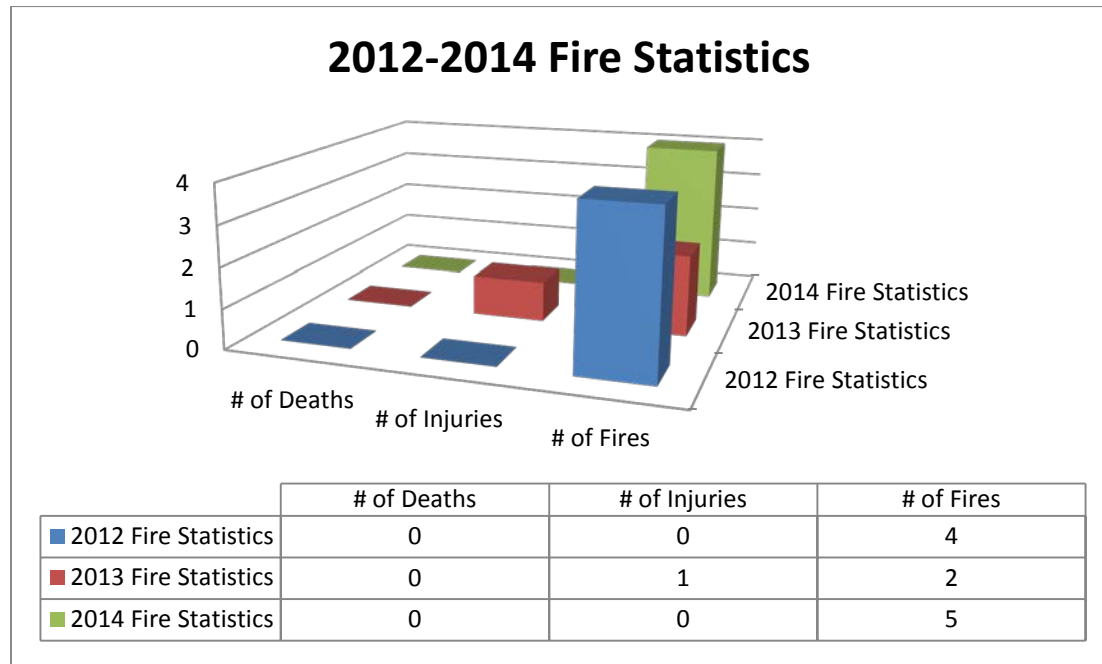

A major upgrade to all the fire alarm systems in the residence halls is currently underway. Historically, smoke detectors in residence halls have been single station detectors that are not tied to the main fire alarm panel. Per New York State Fire Code 907.2.9.1, the upgrade will connect each of the individual student room detectors to the main fire alarm panel. Currently six residence halls have been completed. The plan is to have all student rooms' smoke detectors phased in over a five-year period.

The following is a current status update on the project:

- Upgrades completed in Booth Hall, Day Hall, Dellplain Hall, Ernie Davis Hall, Lawrinson Hall, and Lyons Hall.
- Washington Arms and Sadler Hall fire alarm systems will be upgraded to an addressable system in 2014.

Fire Statistics

Fire #1: At 1:58 a.m. on February 25, 2012, FLSS was dispatched to Lyons Hall to investigate a smoke odor in the main vestibule. Upon arrival the FLSS Officer discovered a fire in the wall around a wall mounted heater located at the main entrance. FLSS instructed DPS dispatch to call the SFD and proceeded to extinguish the fire with a building fire extinguisher. The SFD did an investigation and determined that the fire was caused by an overheated space heater inside the wall. The fire damage was contained to the heater itself with minor extension to the 2x4 studs holding it in place. The estimated damage was: **\$100-\$999.**

Fire #2: At 10:20 p.m. on April 15, 2012, FLSS and DPS were dispatched to Shaw Hall on the report of a fire alarm. Upon arrival DPS found that the alarm was caused by an activated pull box on the 2nd floor but there was also a light smoke condition in the area. FLSS found burnt popcorn in room 282. When FLSS and DPS interviewed the student in room 282, the student said that he/she activated the pull box because the microwave was on fire. The SFD responded to the alarm, inspected the microwave and found evidence of a fire. They disconnected the cord of the microwave to take it out of service. The damage was confined to the microwave. The estimated damage was: **\$100-\$999.**

SYRACUSE UNIVERSITY
Higher Education Opportunity Act
2014 Campus Fire Safety Annual Compliance Report

Fire #3: On November 19, 2012, during a routine health and safety inspection of 200 Lambreth Lane, Apartment #8, by FLSS, DPS, and ORL, it was found that there was fire damage throughout the apartment. The damage was caused by illegal smoking in the apartment, improper disposal of cigarettes, and using lighters on walls and carpets. There were numerous locations throughout the apartment where residents used walls and door frames to put out cigarettes and used lighters to burn holes in walls and doors. There were large burn marks on the door of bedroom B and on the carpet in front of the door. Both students were referred to the Office of Judicial Affairs and were removed from the apartment. The estimated damage was: **\$100- \$999.**

Fire #4: On November 29, 2012, FLSS and DPS were dispatched to 131 Small Road to investigate a report of a fire. Upon arrival the student in the room stated that the fire had occurred the night before but wanted it reported. She said that while she was cooking, some grease had spilled onto the stove top and caught fire. The student stated that it had gotten so large that she had to use the fire extinguisher to put it out. There was no damage to the apartment or the stove. The estimated damage was: **\$0-\$99.**

Fire #5: On March 1, 2013, FLSS and DPS responded to Lawrinson Hall, room 1300, for a pre-alarm fire alarm. Upon arrival, papers that had been smoldering were found in a bag of trash with two burn holes in it. There were also ashes from a smoking device at the bottom of the bag. The student in the room stated that she had partially smoked a cigarette outside and thought she extinguished it. She placed the partially smoked cigarette back in the pack and returned to her room. The student stated that when she got back to her room she found that the cigarette was still burning so she wrapped the cigarette in a napkin and threw it in her trash can. The cigarette ashes were not properly extinguished and smoldered in the trash can burning papers and the trash bag. The estimated damage was: **\$0-\$99.**

Fire #6: On November 14, 2013, FLSS and DPS were dispatched to 201 Lambreth Lane, Apartment #3, on an unknown alarm. When they arrived, they were informed that there was a small fire in the oven but it had already been extinguished. The occupants of the apartment and three guests were attempting to warm up a pizza when they placed the pizza box directly onto the heating element of the oven. The pizza box caught on fire causing moderate damage to the oven. The residents of the apartment used a fire extinguisher to put the fire out. There was one injury. The student who took the pizza out of the oven sustained 2nd degree burns to both of his hands. The SFD was not called at the time of the fire but was notified after the incident. The estimated damage was: **\$100-\$999.**

Fire #7: On January 19, 2014, DPS was dispatched to 460 Winding Ridge, Apartment #10, to report a fire that occurred on January 12, 2014. The student in the apartment stated that while cooking, he noticed smoke coming from his oven. He opened the oven door and discovered a

SYRACUSE UNIVERSITY
Higher Education Opportunity Act
2014 Campus Fire Safety Annual Compliance Report

small fire inside. He used the fire extinguisher in the apartment to put the fire out. Housing Zone Maintenance was called to clean the oven. **\$0-\$99.**

Fire #8: At approximately 11:50 p.m. on January 24, 2014, there was a fire in the bathroom of Apartment 511D in Building 413 Small Road, Syracuse, NY 13210. The resident claimed that after finishing a cigarette in his bathroom, he put out the cigarette in water and threw the butt into his plastic trash can that was located between the vanity and the toilet. He then left his room and entered the common area of the apartment before smelling smoke less than 30 seconds later. He and one of his roommates then put out the fire using water from the sink in the bathroom right next to the burning trash can. The SFD and DPS arrived shortly after the alarms went off. The plastic trash can melted onto the linoleum floor and burned a small area on the side of the vanity that it was abutting. **\$1000-\$1999.**

Fire #9: On August 24, 2014 at approximately 6:50 p.m., FLSS was called to 211 Slocum Heights, Apartment #4, on the report of a possible oven fire. The residents in that apartment reported that when they turned on the oven to pre-heat it, heavy black smoke came out of it before they started to cook their food. It was found that these students were storing their oven mits in the broiler below the oven. When they turned on the oven, the oven mits caught on fire. **\$0-\$99.**

Fire #10: At approximately 10:00 p.m. on October 16, 2014, the SFD and FLSS were called along with DPS to an oven fire at 210 Small Road, Apartment #4. The residents in that apartment were trying to speed up the process of drying their shower towels by placing them in the oven. The towels were placed on the heating element of the oven which started a fire. The SFD was called but the fire was already out when they arrived. The residents used their fire extinguisher to put the fire out. **\$0-\$99.**

Fire #11: On December 12, 2014 at 11:05 p.m., the SFD and FLSS were dispatched to Shaw Hall on the report of a fire alarm. Upon arrival, the Safety Officer found that a cigarette was improperly disposed of in the 5th floor trash room causing a small smoldering fire. The fire was extinguished and no damage was caused. **\$0-\$99.**

2014 Student Housing Fire Alarms

The following provides information about the fire alarms in Syracuse University student housing during calendar year 2014.

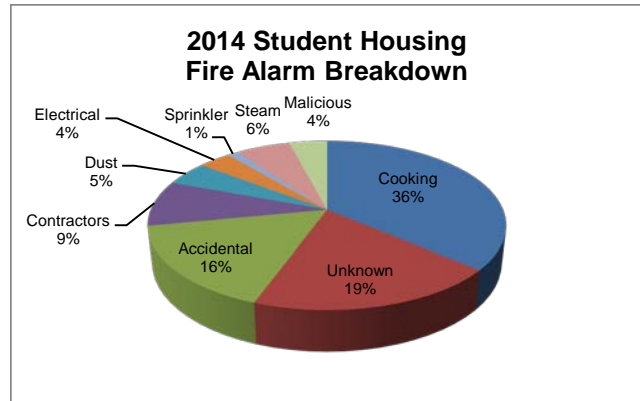

Causes:

1. Cooking- A fire alarm activation caused by a smoke condition from cooking. This includes food burnt in a microwave such as popcorn.
2. Accidental- A fire alarm activation caused by a student or employee by accident. A few examples would be the use of aerosols, cleaning materials, curling irons, or hair spray.
3. Steam- A fire alarm activation caused by a steam condition from a shower or steam from the mechanical room.
4. Dust/Insects- A fire alarm activation caused by an accumulation of dust or the presence of insects in a smoke detector.
5. Sprinkler- A fire alarm activation caused by a component of the automatic fire alarm system. Examples would be a broken sprinkler head, air leaks, or a surge in the system.
6. Malicious – A fire alarm activation caused by a malicious act to a fire safety protection device such as activating a pull box or tampering with a life safety device.
7. Electrical- A fire alarm activation caused by an electrical malfunction.
8. Contractors- A fire alarm activation caused by an outside contractor performing maintenance, construction, or renovations in a residence hall.
9. Unknown- A fire alarm activation that cannot be determined or was unfounded.
10. Fire- A fire alarm activation caused by a fire in the building.

2014 Student Housing Fire Alarm Breakdown:

1. Cooking	62
2. Accidental	28
3. Steam	10
4. Dust/Insects	8
5. Sprinkler	2
6. Malicious	7
7. Electrical	6
8. Contractors	15
9. Unknown	33
10. <u>Fire</u>	<u>1</u>
Total:	172

Syracuse University Emergency Evacuation Procedures

- When the fire alarm sounds, all persons are to evacuate the building.
- Do not use elevators.
- Shut/lock doors behind you as you leave.
- Take keys and essential personal items.
- If instructed to evacuate, move at least 500 feet away from the area and await further instructions from emergency personnel.
- Do not re-enter the building until instructed by emergency personnel.

Procedures to Follow in Case of a Fire

- See a fire – pull the alarm – exit the building using the NEAREST exit, not the one you are most comfortable with.
 - Know where all stairwells and exits lead to.
- DO NOT attempt to extinguish the fire yourself.

SYRACUSE UNIVERSITY
Higher Education Opportunity Act
2014 Campus Fire Safety Annual Compliance Report

- Hear an alarm – exit the building. Failure to leave results in referral to the Office of Judicial Affairs.
 - FIRST:
 - Check the top of your door for heat – DO NOT open if hot to the touch.
- DO NOT use elevators as a means of exit.
- Gather outside the building at the location identified by your Resident Advisor as the meeting place for your floor.
- Have information about the emergency – report it.
